

XM Instant Traffic & Weather is the most valuable part of the XM Satellite Radio system. Living in the Baltimore, MD area and commuting in the Baltimore-DC region means dealing with major traffic congestion. Instant Traffic has saved me, and I'm sure many others, from waiting in jammed traffic and helped me to avoid getting stuck in accident delays. I don't have to wait for local stations to get around to doing the traffic or deal with the severe lack of information that they give. For these reasons and many others, please REJECT the NAB's petition 04-160. Thank you for your time.
